Rod ALBORES

ABOUT ME

Rodel "Rod" Albores is a Filipino tech innovator, blockchain advocate, and community leader based in Davao City. As the eldest among five siblings of a retired military officer, Rod was born and raised in the Philippines.

His educational background spans both technical and business domains, having studied Computer Engineering as well as Economics and International Business. This interdisciplinary education has equipped him with a unique perspective that blends technological expertise with business acumen.

With over eight years of experience, Rod's professional journey includes working as a Senior Full Stack Developer at Casa de la Familia, based in California, United States.

Currently, Rod serves as the founder of Reverion Technologies and co-founder of RER DAO, while also representing Peaq as their Ambassador for the Philippines. His work focuses on integrating decentralized technologies into real-world applications, particularly in training Web3 developers and modernizing local government systems, education sector, and agriculture.

As an active member of ICT Davao Inc., Rod specializes in AI/ML, cybersecurity, blockchain, and web development. He has collaborated with Davao City's IT department to enhance cybersecurity and implement decentralized solutions using Internet Computer Protocol (ICP) technology.

Through his initiatives and advocacy, Rod exemplifies the integration of technology and community development, leveraging his diverse expertise to foster innovation and resilience in the Philippines' digital landscape.
